### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest, in a method of making a running board assembly by extrusion blow molding around an insert, the steps of inserting the insert into a subcavity provided in a mold component; holding the insert in place by applying vacuum pressure to the subcavity; and expanding a parison within the mold cavity to simultaneously mold the running board and integrate the insert and the running board, wherein the insert is one of more step plates, one or more trim strips, or a combination thereof. Prior art includes Schlenz (US Patent 4,634,566), which teaches blow molding around a trim strip to form a decorative molding for an automobile. Schlenz does not teach the steps of inserting the insert into a subcavity provided in a mold component; holding the insert in place by applying vacuum pressure to the subcavity or that the product is a running board that is integrated with the trim strip.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
